💼 WORK EXPERIENCE

On-call Operations Manager - Feb 2024 - Jan 2026
- Managed retail operations with fluctuating demand and limited visibility into product performance, where stock planning was reactive and error-prone.
- Analyzed sales patterns and customer demand, built dashboards for monthly and seasonal forecasting, and conducted trend analysis based on store traffic.
- Delivered data-driven recommendations that improved stock allocation, reduced missed sales opportunities, and strengthened inventory planning decisions.
- Learned to convert raw sales data into actionable operational insights and predictive planning strategies.

Freelance System Developer - Jun 2025 - Jan 2026
- **Ego Inventory System**: Worked with a multi-category retail business that lacked centralized inventory visibility, relying on manual tracking methods that caused frequent discrepancies, delayed reporting, and weak accountability.
- Designed and implemented a centralized Laravel + Livewire inventory management system with role-based access control, audit logs, real-time stock updates, and automated low-stock alerts.
- Deployed and maintained the system for daily operational use, enabling managers to monitor inventory in real time, reducing reconciliation errors, and reinforcing the importance of aligning data models, access control, and system responsibilities before implementation.

</> SKILLS & EXPERTISE

Excel   Power BI   Automatio   Pandas & Numpy   RapidMiner   Javascripts   App scripts

Matplotlib & Seaborn   Python   Html & CSS   Bash   Git   R   PHP   Laravel   Linux

Google sheet   Bartender   Tableau   MYSQL   Looker Studio   Canva   Docker   Adobe Photoshop

</> PROJECTS

Analyze Regional Disability of Philippines - Developer
- Built a **web-based data visualization app** using Python and Streamlit to analyze functional difficulty trends among Philippine households (2006–2015).
- Created **interactive choropleth maps and charts** to highlight PWD distribution patterns and support policy insights aligned with RA 7277 & RA 10754.

Work Force Attrition – Developer
- Analyzed employee feedback using **MySQL, Power BI, and Excel** to identify key drivers of low tenure and disengagement, delivering actionable insights to support data-driven HR decisions.

Catsu Dormitory Management System – Developer
- **Developed a Dormitory Management System using Laravel Livewire and AdminLTE to support university housing operations**.
- Enabled management to track resident students, process and approve dormitory applications, and monitor student contract durations

Secondhand Bike Online store
- Built a **Laravel & Livewire-powered C2C bike marketplace** with reactive UI and advanced filtering.
- Implemented **user-generated listings** and direct buyer–seller interaction.

🎓 EDUCATION

Colleges – Aug 2023 – May 2027
- Currently studying Information Technology in Catanduanes States University.

High School – Aug 2017 – May 2023
- Completed the ABM strand in Catanduanes National High School.
