</> PROJECTS

Analyze Regional Disability of Philippines
Role: **Developer**

Built an interactive web application with **Python jupyter and Streamlit** visualizing functional difficulty among Philippine households - 2006-2015) using **choropleth maps, bar, scatter, and whisker plots**. Enabled clear insights into PWD distribution trends, supporting policy analysis aligned with **RA 7277 & RA 10754**.

Work Force Attrition
Role: Developer

Analyzed employee feedback using MySQL and Excel statistical methods to identify key causes of low tenure and disengagement. Delivered actionable insights that highlighted patterns and factors driving employee turnover, supporting data-driven HR decisions.

Air BNB
Role: **Developer**

Analyzed U.S. Airbnb pricing data using Excel, Tableau to identify how geographic factors influence listing prices. Delivered insights showing premium pricing for properties near coastlines and major cities, with significantly lower prices for listings farther from urban centers or with less desirable locations.

Ego Inventory system Developer
- Developed a **Laravel & Livewire-based inventory system** for a multi-category retail business.
- Implemented **role-based access, real-time tracking, audit logs, and low-stock alerts**.
- **Deployed and maintained in production on Hostinger** with remote access for managers.

Secondhand Bike Online store
- Built a **Laravel & Livewire-powered C2C bike marketplace** with reactive UI and advanced filtering.
- Implemented **user-generated listings** and direct buyer–seller interaction.

⬡ EDUCATION

Colleges   Aug 2023 - May 2027
- Currently studying Information Technology in Catanduanes States University with a focus on web development and data analyst.

Working with **PHP, Laravel, MySQL, Excel, Power BI** and basic data structures through academic and personal project.

High School

- Completed the ABM strand in Catanduanes High School, with a strong focus on business fundamentals, financial literacy, management principles, and business growth strategies, including hands-on training in banking and financial tools such as **Microsoft Excel, basic accounting systems, financial ledgers, budgeting sheets, and transaction records**.
